EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The following change has been made in view of changes made in the parent application (10/093,911).

In the specification:

Page 3, line 8, "devices" has been changed to --device--.

2. The following is an examiner's statement of reasons for allowance: the limitations reciting a method for cutting belt material for forming a puzzle cut joint for a continuous belt used in document processing machines including steps of operating a transport mechanism including a vacuum pickup as claimed and monitoring the position of the belt material for accurate registration for punch and die sets to cut mating shapes to form puzzle cut joint as claimed in combination with other limitations set forth claim 1 are not anticipated or made obvious by the prior art. For example, Stevens discloses an electrically controlled transfer apparatus having a suction cup to transport the workpiece from one station to another station. Makeev teaches an apparatus for cutting rolled sheets having a sheet placing mechanism with a pneumatically operated pick-up device. Yu and Schlueter teach an apparatus for forming a puzzle cut seamed belt using a punch and die. However, Stevens, Makeev, Yu, and Schlueter do not teach a method for cutting belt material for forming a puzzle cut joint for a continuous belt used

in document processing machines including the steps of operating the transport mechanism including the vacuum pickup as claimed and monitoring the position of the belt material for accurate registration for the punch and die sets to cut mating shapes to form puzzle cut joint as claimed in combination with other limitations set forth claim 1.
